Vadnais Heights, MN

- Completing work in a fast and high-pressure environment.
- Remaining flexible in a changing, unpredictable environment.

- Arriving early to every shift and completing duties in a timely manner.
- Training new employees in any crew member position.

PROJECTS

Capital Opulence —A personal finance application
This application allows a user to create an account then begin tracking daily financial gains and expenses. Data entered by the user is rendered as a bar graph and stored in the user's dashboard.
https://capital-opulence.herokuapp.com/

Mantis Mocha —A coffee e-commerce site
Mantis Mocha is built with the MERN stack and the Stripe payment API. A fast and customizable user experience was a top priority when developing this application.
https://mantismocha.herokuapp.com/

Movie Finder —Discover and watch thousands of movies
A front-end JavaScript application that utilizes two movie APIs. Movie Finder helps a user quickly find their next movie and where they can pay to watch it, based on genre.
https://cassie-s.github.io/movie-finder/

EDUCATION

Coding Boot Camp Certificate: University of Minnesota

July 2021 – Feb 2022

A rigorous 24-week program focused on gaining proficient technical programming skills essential for front and back-end website development.

Associates in Nursing: Century College
Aug 2019 – May 2021
